github.com/ryanadiputraa | Palu, Indonesia

EDUCATION

Tadulako University, Palu, Indonesia

Anticipated Graduation date: **Aug 2023**

Bachelor of Engineer in Informatics Engineering

GPA: 3.76 / 4.0

Coursework: Algorithm and Data Structure, Microcontroller, Microservices, API

EXPERIENCE

Garena, Jakarta, Indonesia

Sep 2021 – present

Frontend Web Developer intern

- Encouraged user engagement in game by delivering attractive global, regional or multi-regional in game web events by using **ReactJS** for UI and **Directus** for localization.
- Reduced development cost and time for relaunching **CODM Tournament Registration** website by merging 4 codebase for each event and region into single codebase by refactoring repetitive logic on each codebase.
- Delivered relaunchable website by producing clean and reusable code by collaborating with Project Manager, Backend Engineer and Game Operation Team under supervision from a Senior Engineer for each project.
- Maximized users satisfaction by ensuring a delivered website free from bugs and issues by doing testing during QA phase and monitoring during production phase using **Google Analytics**.

Dicoding Academy (Kampus Merdeka), Jakarta, Indonesia

Feb 2022 – Aug 2022

Multi Platform and Backend

- Developed a multi platform mobile app using **Flutter** to simplify shopping on physical stores by scanning QR Code that generated from **NodeJS** backend service.
- Improved soft and hard skills as a software engineer by learning from **Tech and Soft Skills sessions** held by the Dicoding Academy team.

Glints Academy (Kampus Merdeka), Jakarta, Indonesia

Aug 2021 – Feb 2022

International Internship Student

- Developed a simple web application to learn to work in a team and improve code quality by learning clean code by being involved in code review with a mentor.
- Improved soft and hard skills as a software engineer by learning from the **"Pragmatic Programmer"** book, exploring various technologies and its best practices during one-on-one sessions with a mentor, and Career Preparation series from Glints Academy.

PROJECTS

UD Rio (Skills: **Swift, SwiftUI, Golang, PostgreSQL, Docker**)

Aug 2022 - present

- Developed iOS App to make it easier for customers to shop from home, offer promos, and more about UD Rio retail store through the app.

SimKeu (Skills: **ReactJS, Golang, PostgreSQL, Docker, Tailwind CSS**)

Aug - Dec 2021

- Created an information system that is used by Tadulako University's finance division to centralize and improve data visualization by extracting excel sheets input from each faculty and displaying it in a web based dashboard.

GervichStore.ID (Skills: **ReactJS, ReduxJS, Golang, PostgreSQL, Docker, Material UI**)

Feb 2021 - May 2021

- Developed a web based online shop to help shop owner manage product sales by automating stock for each product and enabling owner to easily configure each product detail.

SKILLS

Proficient: ReactJS, JavaScript, TypeScript, ReduxJS, NodeJS, SQL, Git, HTML5/CSS3
